Geograma becomes the first international customer of e-Cassini and its distribution partner AL1 International Consulting

*As part of the **BIM World** trade show held in Paris on April 3 and 4, 2024, **e-Cassini** and its partner **AL1 International Consulting** signed a major collaboration contract with **Geograma**!*

Geograma is a Spanish company based in the Basque Country for 26 years, specializing in geotechnologies and geospatial analysis.

It offers innovative solutions for territorial and environmental management.

Geograma focuses on software development, data integration and consulting.

Geograma aims to improve decision-making through the use of georeferencing and data analysis technologies.

Geograma will be able to use the **GéoCassini** platform with its customers, a 100% web-based platform accessible in SaaS mode, dedicated to the storage, management, operation, updating and sharing of all data describing space and its content.

GéoCassini enables the synchronized use of all types of 2D and 3D data, both public (Open Data) and private, including 3D point clouds derived from LIDAR captures.

The platform also offers a wide range of digital twins and applications for data processing, use case applications and artificial intelligence (AI) applications.

Geograma activities with georeferenced data:

- Data management and governance to ensure that data is compiled, stored and used in a safe and compliant way;
- Processing data to transform it into meaningful information;
- Using and exploiting data to inform, make decisions and create value.

Geograma Professional Services:

- **Licensing:** supply of licenses and data to companies and public bodies such as Tomtom and Here;
- **Data integration:** unification and harmonization of data to support decision-making;
- **Map applications:** supply of customized map applications;
- **Land:** land services to help administer land;
- **Consulting:** strategic or specialized GIS consulting services to help organizations make the best decisions;
- **Data management and governance:** data management services to help safeguard and access data;
- **Indoor:** indoor localization services to manage assets in buildings.

We are very proud to have an international partner of Geograma's calibre, which is a benchmark in Spain!

Many thanks to the Geograma team for their confidence, and in particular to Alejandro Guinea de Salas, Juanmi Álvarez Paredes, Sergio Jorin Abellán and Gonzalo Piay Crespo!

About e-Cassini:

e-Cassini was created in 2017 with the aim of simplifying the day-to-day administration of public space, making it easier to draw up different types of plans (including street layouts, facades, networks, etc.) and consult geolocated data, taking advantage of the opportunities offered by technological innovations. This is a 100% web-based platform accessible in SaaS (Software as a Service) mode, dedicated to the storage, management, operation, updating and exchange of all data describing space and its contents.

About AL1 International Consulting:

With more than 60 senior consultants and partners in Spain and around the world, and an operational entrepreneurial culture oriented towards results, we cover the needs of RRHH advice and support in terms of national and international development strategy, opening up of new markets, restructuring, mergers and acquisitions, as well as marketing, sales, human resources, industrial relocation or sustainable relocation, both in Spain and internationally.
