

IAPA DESIGN

IAPA DESIGN is an international design firm established in 1998. The firm is led by an experienced team of architects from Australia and around the world. IAPA's main office is located in Sydney, Australia, with an operational office in Guangzhou, China for Asia and Middle East. IAPA is well practiced in a wide range of design disciplines, including urban design, architectural, landscape, and interior design.

IAPA has attracted exceptional design talent from around the world thanks to its modern cutting-edge international design philosophy and excellent reputation within the industry. Our unique mix of talent is what enables IAPA to design with international expertise and local sensibility. These exceptional designers from Australia, Europe, Asia, the Americas, and the Middle East form IAPA's distinctive, multidisciplinary, and multicultural design team.

With outstanding creative capabilities and over 20 years of accumulated experience, IAPA have successfully completed hundreds of exceptional projects. These projects encompass a wide range of disciplines, including comprehensive planning and design for urban core areas, waterfront districts, urban parks, scenic areas, residential communities, heritage preservation, and creative industrial parks. IAPA have also undertaken various types of public projects such as commercial complexes, hotels, libraries, museums, exhibition halls, theaters, visitor centers, science centers, cultural centers, underground spaces, as well as different types of landscape and interior design project.

IAPA has been honored with numerous international awards for its outstanding design quality. These accolades include being shortlisted for the World Architecture Festival, winning the Best of Best Award of Iconic Awards, the Gold Award of A' Design Awards, the German Design Award (GDA) winner, the International Architecture Awards winner, the honorable mention of ARCASIA Architecture Awards, the RIBA Competition Winning Award, the Merit Award of Gold Nugget Awards, the BLT Design Awards winner, the Silver Award of A&D Design Awards, the LOOP Design Awards winner, the Paris DNA Design Awards winner, the Architecture Master Prize Awards winner, the Gold Winner of MUSE Design Awards, the Global Design News - Future Architecture Award, the AHLA Asian Landscape Award winner, the ELA International Landscape Award winner, the China Yuanye Cup Urban Design Award, and the Guangzhou Excellent Engineering Design First Prize, among others.

IAPA's Five Major Design Capabilities

Preliminary Planning

Urban Planning & Urban Design

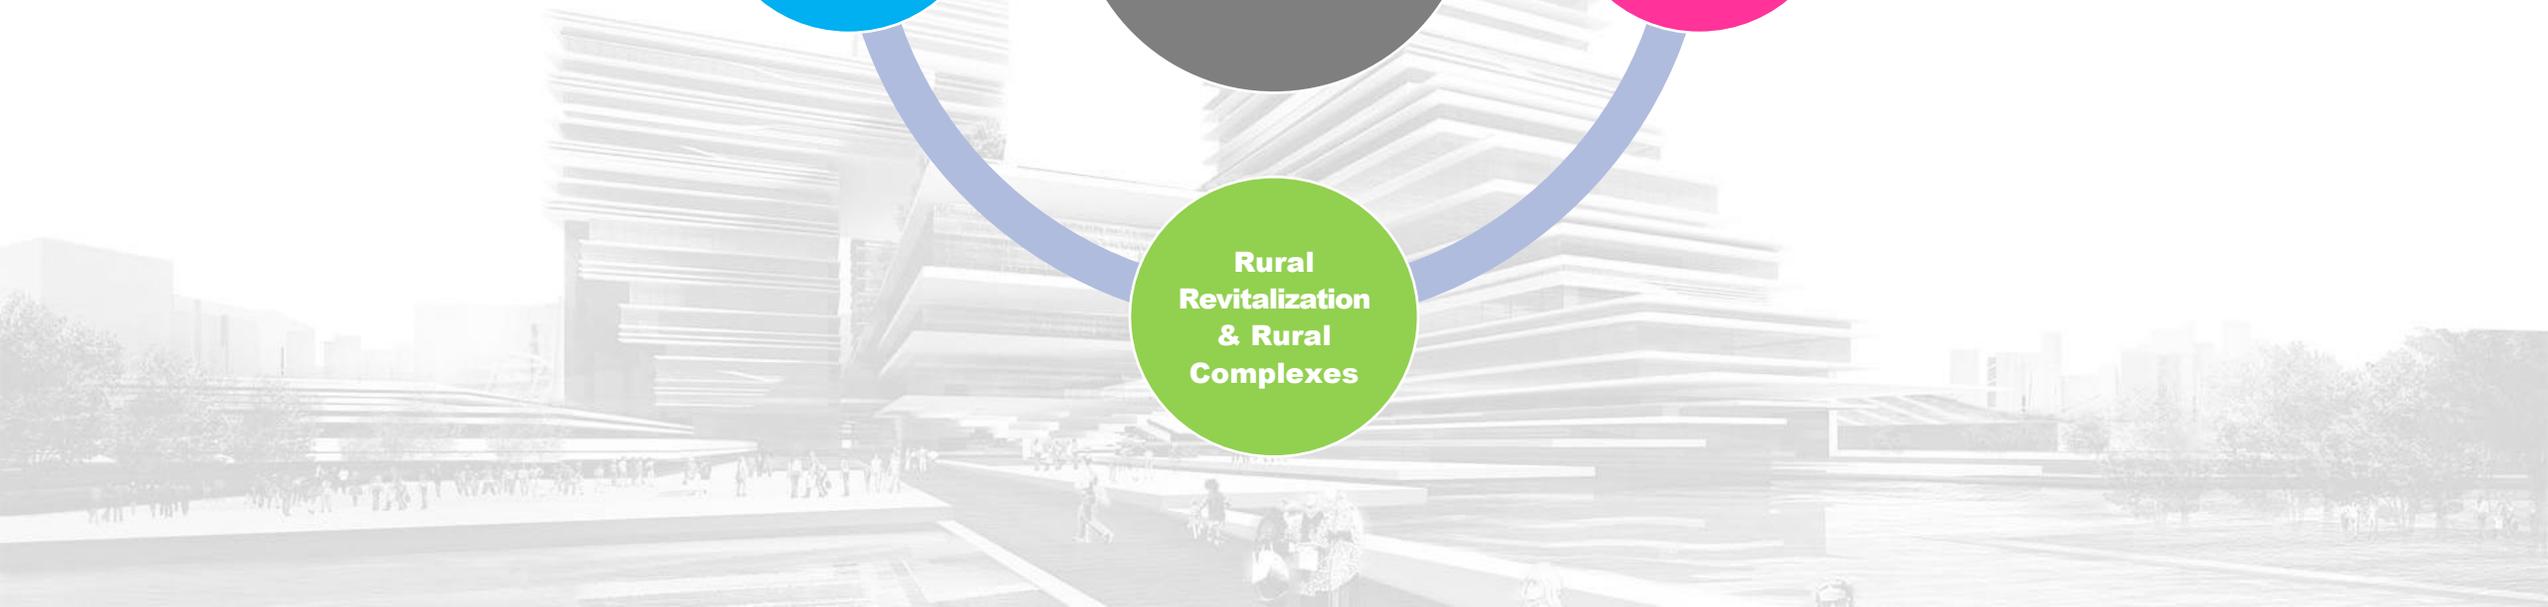

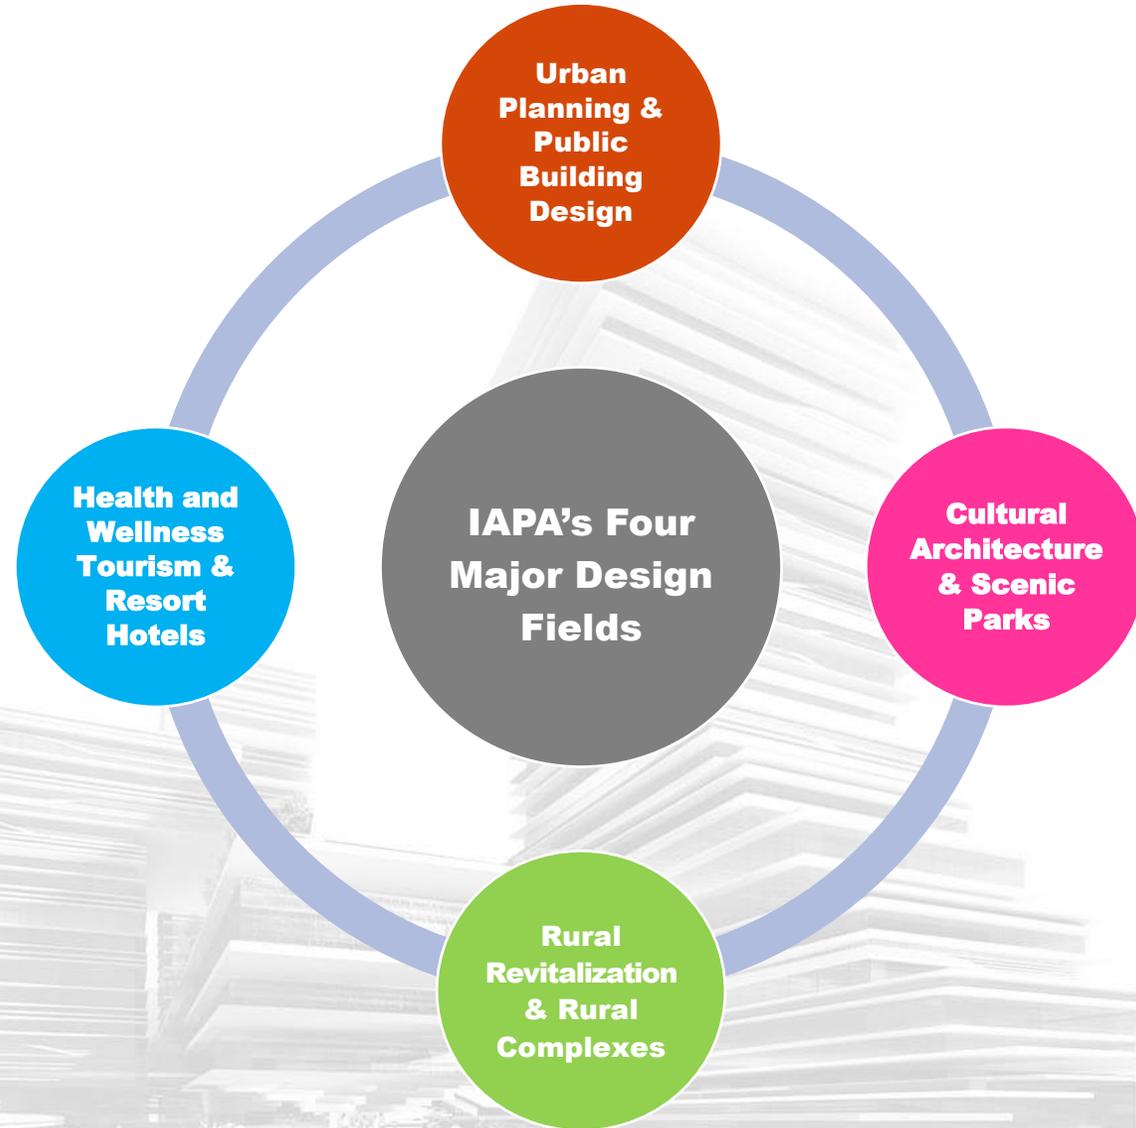

Architectural Design

Landscape Design

(From Conceptual Design To Construction Drawings)

Interior Design

(From Conceptual Design To Construction Drawings)

Six Design Philosophies of IAPA

• **Modern Design Techniques to Interpret Traditional Oriental Philosophy**

IAPA excels in in-depth understanding and research of a city's culture, history, and natural environment. This helps us integrate local elements and features into our designs to create solutions that align with the city's image and ambiance.

• **Emphasis on Creativity and Innovation**

IAPA possesses strong creativity and innovation capabilities, proposing unique and forward-thinking design concepts. We can apply innovative thinking and design principles to bring new perspectives and methods to urban development.

• **Multidisciplinary Backbone and Integrated Design Capability**

IAPA has a multidisciplinary backbone, integrating knowledge and skills from various fields such as urban planning, architectural design, and landscape design. We can coordinate various interests, collaborate with governments, businesses, and communities to drive urban planning and development.

• **Sustainable Development Awareness**

IAPA focuses on environmental protection and sustainable development, having knowledge and experience in sustainable urban planning and design. We can propose solutions to reduce environmental impact, promote urban sustainability, including energy conservation, emission reduction, and water resource management.

• **Service Orientation and Communication Skills**

IAPA is orientated towards delivering excellent service with clear communication, establishing good collaborative relationships with clients and stakeholders. We excel at listening to clients' needs and opinions in order to incorporate them into design solutions.

• **Practical Experience and Project Management Capability**

IAPA has rich practical experience and project management capabilities, effectively organizing and managing urban planning and design projects. We can collaborate with various parties, coordinate resources, and ensure the smooth implementation and delivery of projects.

In conclusion, IAPA through its awareness of urban culture and local environments, outstanding creativity and innovation, sustainable development consciousness, multidisciplinary background and integrated capabilities, strong service orientation and communication skills, as well as extensive practical experience and project management capabilities, will provide comprehensive and integrated design solutions for urban development, driving cities towards sustainable, innovative, and humanistic progress.

IAPA's international footprint of projects
