

# Smart Sustainable Building Management software

Planon is the leading global provider of real estate and facility management software. Our future-proof, IoT-enabled solutions allow you to connect your buildings, people and processes, by eliminating data silos and aligning solutions into one shared information platform.

This provides all building stakeholders – owners, users, and services providers – with actionable insights to effectively manage buildings and infrastructure, saving costs, meeting governance and sustainability goals, and creating attractive and engaging built environments.

**How our solutions empower  
your organization to new  
achievements:**

Make better  
decisions

Reduce carbon  
footprint

Improve  
accuracy

Ensure business  
continuity

Build customer  
satisfaction
