ABOUT US

We are the leader of AI and computation in architectural and engineering process.

We are dedicated to helping architects and engineers cut down time and money spent on documentation.

Utilizing advanced technology and AI, we automate tedious, repetitive tasks so your team can focus on sustainability, user experience, and data-driven design. This shift allows firms to improve overall efficiency and design quality, while achieving a higher profit margin..

Lean Architect

Let's be part of making the future, not just living it!

OUR PROCESS

Observation & Analysis
In-person observation of your firm process and work-flow

Production
Custom-made technology tailored for your firm

Deployment & Training
We provide continous training for best use of our technology

WHY CHOOSE US

Seamless Integration
Our technology is easy to use and does not require a new software

Lowest Cost
Competetive custom pricing that will pay for itself

Versatile Utilization
Our technology will not override the architect at any point

OUR SERVICES

AI Technology:
We have mastered integration of AI into architectral process

Task-Based Technology:
This will make documentation process more efficient & accurate

Process-Based Technology:
This will provide data-driven desing with infinite iterations
